We began as building consultants frustrated by clipboards and guesswork—so we built Ai Assets: an asset management company that streamlines capture, updates and access for HVAC, electrical, mechanical and more.

Today we pair on-site expertise with our platform to deliver accurate, audit-ready data from day one. Our consultants verify what's really on site and produce clear, consistent asset registers—the foundation for maintenance, compliance and lifecycle planning. By uniting practical know-how with smart tech, we give you a complete, up-to-date view of your assets and a confident, data-driven path to protect value and optimise performance. We're not just managing assets; we're reshaping property and asset management.
