Are you looking for a 4-bedroom, 2.5 bath home that includes a 2-car garage? Well, your search is over! When you walk in this clean and charming home, you will be met with a two-story foyer and an open floor plan. The recently updated kitchen includes Level 3 granite countertops, stainless steel appliances, a new dishwasher and luxury plank flooring! The first floor includes a cozy living room with a never before used fireplace and a dining room that will accommodate large family dinners. You will not have to worry about heating and cooling since a new HVAC system was installed in 2019! Oh, it's not over, a shed is included for extra storage and get ready for outdoor entertaining as your deck is already screened in which eliminates those pesky mosquitos! Upstairs, new flooring continues and you will be met with 4 bedrooms and a large Master bedroom with a large, recently renovated en-suite, that includes modern sinks, a seamless glass shower, garden tub and a large walk in master closet. But wait, there's more! Your home will be secure as a Ring security system is included that has a video doorbell, door alerts and window protection.

THIS HOME WILL NOT LAST!
